

**Author's Name**

**Thesis Title**

**Reviewer's Name**

**Workplace & Position**

**1. Thesis topic:** Thesis topic must be relevant to the field of study with pertinent and professional questions and reasonings. The significance and appearance of the topic also needs to be interpreted in an international context.

**2. Structure:** Well-structured thesis with a clear flow of ideas; the transitions between chapters are logical, and the length of each chapter is proportionate.

**3. Literature:** The sources and quality of the literature presented for the theoretical overview.

**4. Methods:** Relevant and detailed presentation of the methods used for the study and analysis, with appropriate approaches applied to the issue based on the level of training.

**5. Data selection:** A Informed and thoughtful selection of data for the analysis of a practical problem.

**6. Examination & analysis, interpretation:** Competent examination and analysis with accurate interpretations, taking into account the context (including international), based on the level of training.

**7. Individual contribution:** The author's original thoughts and conclusions and the extent of the individual contribution to the topic.

**8. Summary of results:** Thorough and comprehensive summary of results (including an interpretation of own analysis in relation to theoretical considerations) with interpretation of practical usefulness/applicability.

**9. Sources:** Appropriate referencing of sources based on academic expectations, providing accurate citations.

**10. Style & Layout:** Well-designed thesis with a high quality (academic, professional) style and layout.

---

**Written evaluation** (Please provide your concise opinion, in 5-6 lines, in line with the above categories.)

**Questions** (Please provide 3 questions about the thesis.)
